

AUTOMATIC DOWNLOAD OF TEST DATA

BLUEPIRAT
:BY MAGNA

Integrated
into
System
Client

COLLECT, SORT AND DISTRIBUTE DATA AUTOMATICALLY

Key features:

- Innovative system for Mobile Data Acquisition
- A perfect addition to all blue PiraT data loggers – and a great solution for globally operated testing fleets and test houses with particularly large data amounts
- Now integrated into System Client – no additional hardware required
- Automatically downloads all recorded data (e.g. MOST, CAN, LIN, FlexRay)
- Allocates the data according to your individual preferences (groups/projects)
- Automatic transfer of the trace records to your company servers via intranet possible
- Creation of bug reports and installation of firmware updates – everything runs automatically
