SMART OPERATION

BLUEPIRAT
BY MAGNA

blue PiraT Remote offers everything in one device: data logger and remote control with touch display.

Key features:

- Intuitive operation via the innovative, automotive-grade 5-inch touch screen
- Easy integration into a logger network via System Link
- Can be used as a compact standalone solution or as a remote control for all devices connected via System Link
- Two CAN-HS interfaces, one LIN interface
- Audio recording and playback possible
- Professional holder for safe installation in the car available

View bus loads at any time.

With the blue PiraT Remote you always keep in view the load on all vehicle buses. Furthermore, you can set triggers.

Flexible and expandable – System Link

Build your measuring system from modules or expand your existing system quickly, easily, and flexibly: System Link consolidates all blue PiraT data loggers in one network so they can be operated like a single device. The touch screen of the blue PiraT Remote is ideal for controlling all connected loggers, and it can also be used to view the recorded data directly in the vehicle.

Interfaces blue PiraT Remote

CAN-HS	2
LIN	1
Gbit Ethernet / System Link	2
USB 2.0 Device / Host	1
Analog / Digital IN	2
Seriell RS232	2
CAN-LS	1

Technical specifications blue PiraT Remote

Voltage range	5 - 29 V, start-up from 7 V
Current consumption	< 440 mA (typical), < 1 mA (standby mode)
Start-up time	< 210 ms
Temperature range	-20 °C ~ +60 °C
Timestamp resolution	1 µs
Wake-up via	Bus activity (CAN, LIN, RS232), KL15
Dimensions	150 x 25 x 92 mm (W x H x D) [^]
Memory	16 GB
